

# 5 CONSECUTIVE YEARS DEFICIENCY-FREE

ROOTED IN IOWA. COMMITTED TO CARE.

## Here's what makes five years deficiency-free so remarkable:

**Only about 5% of facilities in Iowa earn a deficiency-free survey in a given year.**

This statistic reflects how rare it is for a nursing facility to successfully meet every regulatory standard during a comprehensive inspection.

**Nationally, nursing facilities average ~9.5 deficiencies per survey cycle (CMS data).**

Because surveys are detailed and comprehensive, even minor findings result in citations, making deficiency-free outcomes exceptionally rare.

At Westview of Indianola, we're proud to announce that our care center has finished **five consecutive years with ZERO deficiencies** on annual state inspections; a milestone that sets us apart in long-term care.

Westview of Indianola's five-year deficiency-free record places it in an elite group of providers that demonstrate consistent excellence in care delivery, regulatory compliance, and operational quality.

This distinction is more than a statistic - it's a reliable indicator to residents, families, and referral partners that Westview delivers exceptional standards of care year after year.
